# ASTRA VW - GT

WHY DON'T YOU MAKE A VW LOOK LIKE THIS!

IT'S FUN! IT'S EASY AND EXCITING TO DRIVE! LESS THAN 12  
HOURS TO ASSEMBLE. AND COST FOR A COMPLETE UNIT: ONLY \$595.00.

**No chassis modifications! Bolt on and drive.**

**WE ARE ORIGINAL AND EXCLUSIVE**

The clean lines which prevail, are truly characteristic of the Astra fiberglass sports car bodies. The Astra VW-GT has been created to satisfy the public's demand for styling similar to that of the Ford GT. While the Astra body maintains the quality and personality of the Ford GT, it fits directly on a Volkswagen chassis. Now don't compare this to just an ordinary Volkswagen. The heavy Volkswagen iron has been removed and the unique Astra Volkswagen fiberglass body has taken its place. Immediately the horse power to weight ratio changes increasing the existing horse power efficiency. The wide opening doors and the easy to open deck lid incorporate all the conveniences of futuristic styling. Of course, the big surprise is the space behind the seats, which can be used for seating and package area. By eliminating chassis modifications our customers have the opportunity to completely build this sports car kit in their own garages. Absolutely no welding or reinforcing is necessary on the chassis. All of the fiberglass work is done, while the customers main job is to assemble existing parts. Ample room is available if you wish to run a Corvair or Porsche engine. You will find the Astra VW-GT to be the most exciting sports car on the street, strip, or in a show. Manufactured in one piece, shipped in one piece and assembled in one piece, makes your construction job economical and shorter by days. As always, you will find Astra sports car bodies to lead the field in styling and design nad the Astra VW-GT continues this trend, as we now start our sixth consecutive year.

## VW MAGS \$37.50 ea
